## PERSONAL PROJECTS

### 1. Recipe Recommendation Android App - Food Mood (01/2021 - 05/2021)

- The Application recommends top recipes with the help of ingredients users have.
- Uses Android Studio to design and develop the whole application.
- To implement a recommendation Algorithm, we use Chaquopy Python SDK.
- The App include a chatbot which is developed with the help of Dialogflow.

### 2. Hospital Management System (04/2021 - 05/2021)

- [github.com/sankyulkarni6413/Hospital-Management-System](https://github.com/sankyulkarni6413/Hospital-Management-System)
- C# windows based application that Manages the Hospital related tasks and gives a user-friendly experience.
- Microsoft SQL Server used to store records and perform CRUD operations on it.

### 3. Inventory Management System (11/2020 - 12/2020)

- [github.com/sankyulkarni6413/INVENTORY-MANAGEMENT-SYSTEM](https://github.com/sankyulkarni6413/INVENTORY-MANAGEMENT-SYSTEM)
- For the continuous supply of the products as well as to maintaining the storage we make a command Prompt based Java Application.
- Oracle 10g Database to maintain a systematic record of inventory.
